The Federal Mafia

BANNED

Irwin Schiff has appeared on national TV and radio raising legitimate questions regarding the legality of the federal income tax and has written 13 books on the subject. And now, as of June, he may be the only contemporary author banned from selling his books and the only one alive to tell about it.

*Although Irwin Schiff won't be able to provide you with his most comprehensive of de-tax books, an autographed copy of **The Federal Mafia** will be auctioned off as a benefit for **The Idaho Observer and Vaccination Liberation**.*

Feel Free to bring your favorite potluck salad or side dish to share as you socialize with other real Americans. Plenty of hamburgers, hotdogs, drinks and desserts have been donated by numerous local businesses.
